

Introduction to Microsoft PowerPoint 2003

Learn how to create a simple, effective slide show presentation using Microsoft PowerPoint. This beginning class will cover all of the basics including adding clip art and shapes to your slides, editing text, using the efficient outline mode to brainstorm your ideas, and using a professionally-created template to add the final touch. Participants will also learn how to easily save their slides to a CD for distribution. If requested, the instructor can also show participants how to use their specific model of projector and laptop to show a presentation.
